PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience developing scalable full-stack applications using React, FastAPI, PostgreSQL, and IoT-based solutions. Strong problem-solving foundation with 150+ LeetCode problems solved, CodeChef DSA Rating of 1702, and multiple HackerRank 4★–5★ badges. Seeking a Software Engineer or Full Stack Developer internship to build reliable and impactful software solutions.

EDUCATION

B.Tech – Information Technology

Expected May 2027

SRM Institute of Science and Technology, Trichy, Tamil Nadu | CGPA: 7.06 / 10

TECHNICAL SKILLS

Languages: Python, Java, C, C++ **Frontend:** React, HTML5, CSS3, Vite **Backend:** FastAPI, REST APIs, Async Python, Flask **Database:** PostgreSQL, Firebase, Supabase **Cloud & DevOps:** Docker, GitHub Actions, Google Cloud Run, Vertex AI **Artificial Intelligence & IoT:** Gemini API, OpenAI API, ESP8266 (NodeMCU), HC-SR04 **Tools:** Git, GitHub, Postman, VS Code, Google Colab

INTERNSHIP EXPERIENCE

Full Stack Development Intern — VDart Academy

June 2025 – July 2025

- Developed full-stack web application components using React and FastAPI following industry practices.
- Integrated REST APIs with backend services and structured relational databases for scalable data access.
- Applied agile workflows, code reviews, and collaborative development practices with mentors.

PROJECTS

Smart Waste Collection System Using IoT and AI | Python · Flask · Firebase · ESP8266 · HC-SR04 · Google Maps API

- Engineered an IoT system using ESP8266 and ultrasonic sensors to monitor bin fill levels and stream real-time data to Firebase.
- Built a Flask backend with dashboard visualization for live monitoring, alert triggering, and cloud-based data management.
- Integrated AI-driven route optimization using Google Maps API to reduce collection trips and improve operational efficiency.

Task Management System | React · TypeScript · FastAPI · PostgreSQL · JWT

- Built a full-stack task management app with JWT authentication, CRUD operations, and status tracking.
- Designed a normalized PostgreSQL schema with foreign key constraints ensuring strict multi-user data isolation.
- Implemented protected routes on both React frontend and FastAPI backend for secure, role-based access control.

CI/CD Pipeline – Dockerized Full Stack Deployment | Docker · GitHub Actions · GCP Cloud Run · React · FastAPI

- Engineered an end-to-end CI/CD pipeline with GitHub Actions to automate linting, builds, and GCP Cloud Run deployments.
- Wrote optimized multi-stage Dockerfiles for React (Vite) and FastAPI to produce lean, production-ready images.
- Secured deployments using GitHub Actions secrets for GCP service account credentials with zero manual intervention.

CERTIFICATIONS

Getting Started with AI — IBM SkillsBuild | Programming with JavaScript — Meta | Databases and SQL for Data Science — IBM | Cloud Computing Fundamentals — Google Cloud | API Student Expert — Postman

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Solved 150+ LeetCode problems across Dynamic Programming, Graphs, Trees, Backtracking, and Binary Search.
- HackerRank: Python ★★★★★ | C++ ★★★★★ | Problem Solving ★★★★★ | C ★★★
- CodeChef: DSA Rating 1702 | Contest Rating 1453 (Division 3) | Python Skill Test ★★
- Won appreciation and recognition at TEXPERIA 2026 Hackathon, SNS College of Technology.
- Completed 6+ industry certifications in AI, Cloud, SQL, JavaScript, and NLP from IBM, Meta, Google, and Infosys.
